WHAT IS CODRADO?

Codrado is a platform for Next-generation protection and security to the use of modern blockchain technologies such as AI, machine learning, and behavioral analysis in detecting new threats.

It also loosely focus on the use of non-signature based blockchain technologies and creates a clear distinction between signature-based technologies which detect attacks based on known attack behavior

OUR SOLUTIONS

Malware protection

Protect your business from malware designed to harm your business with Codrado's research-led solutions that are tested, analyzed, and constantly improved through analyzing hundreds of thousands of new samples every day.

Ransomware protection

Ransomware is a form of malicious program used by criminals to extort money by locking and encrypting your business devices and data.

Endpoint Detection and Response

Detect targeted attacks on your business that bypass endpoint protection and prevent breaches of critical data and infrastructure.

Deepguard

DeepGuard offers dynamic proactive behavioral analysis technology that efficiently identifies and intercepts harmful behavior. When used in tandem with other components of a multi-layered security approach, DeepGuard provides a lightweight and comprehensive endpoint protection with minimal impact on the user experience.

Security Cloud

Codrado Labs analysts actively monitor the threat landscape for new threats and research the most effective ways to detect malware, which go into updates to the rules used by the databases and analysis systems. The updates then take 60 seconds to replicate across all products connected to the Security Cloud, ensuring that they always have the latest threat intelligence.

Broad Context Detection

Flags indications of possible breaches by alerting admins of Tactics, Techniques, and Procedures (TTPs) used in targeted attacks from abnormal activity of standard programs to the running of unexpected scripts. Some detection may require deeper analysis and guidance by specialized cyber security experts. To address this, the "Elevate to Codrado" service alerts Codrado analysts immediately and analysts will have access to the incident data to help you to solve the case.

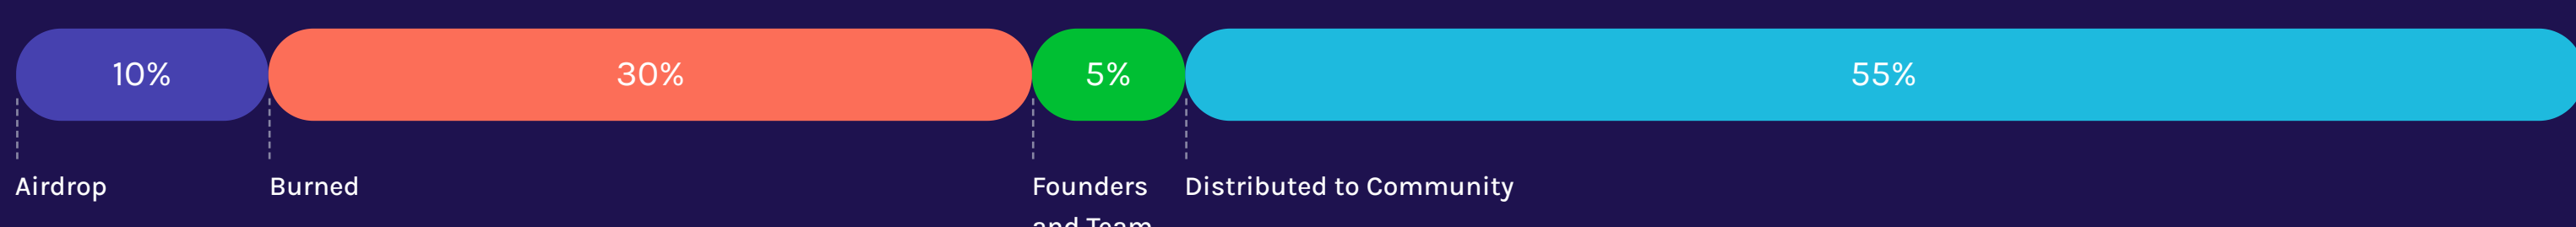

TOKENOMICS

- ✓ Coin Name: RADO
- ✓ Total Amount: 1,000,000,000 RADO
- ✓ Contract: 0x195befB4377C7E484517FF3e265c7a5f8e47F26b
- ✓ Code: BEP20
- ✓ Network: Smart Chain
- ✓ Slippage: 0%

Our Target
3,000,000+ Holders

CODRADO TOKEN STRUCTURE

HOW TO BUY \$RADO TOKEN?

Download & setup MetaMask or TrustWallet

Download [MetaMask](#) (a crypto wallet in the form of a browser extension) or [TrustWallet](#) (an app for your phone). After that, you will have to add the Binance Smart Chain to your network-list. ([Click here for a step-by-step tutorial](#))

Buy and send BNB to Metamask or TrustWallet

WHAT STAGE ARE WE AT?

Aug, 2021

Platform Idea

The origin of Codrado platform idea. Development of the concept and business plan.

Sep, 2021

Fundraising

Attracting of \$ 300,000 investment. Team building.

Oct, 2021

Attraction of Advisors

Attraction of advisors. Development of the Codrado platform mock-up. Technical audit.

Nov, 2021

Trade Enquiries

Development of a partnership model in Codrado ecosystem. Trade enquiries. Development of IQ RADO API. Start of the platform development. Start of ecosystem formation (more than 30 partners).

Jan, 2022

Integration with blockchain

The platform integration with Ethereum blockchain. Development of RADO blockchain control subsystem. Integration of RADO API with partner applications. Release of platform's beta version. Start of RADO wallet and tournament functionality development.

May, 2022

RADO Wallet release

Platform and RADO wallet release. Cyber protection services API integration and tournaments release. Continuation of an active marketing campaign to attract end-users.

Sep, 2022

Development of RADO SDK

Further development of the ecosystem (2000+ partners, 45+ IQ RADO applications, 2.5 million active users). Development of RADO SDK.

Jan, 2023

RADO SDK release

RADO SDK release. Additional game mechanics development. Involvement of partners to develop new applications based on SDK.

May, 2023

Implementation of AI

Implementation of AI technology in RADO API and RADO SDK. Addition of new mechanics using AI into the list of game mechanics.

January, 2024

Further Development

Further development of RADO ecosystem (10,000 partners, 150 IQ RADO applications, 15,000,000 active users).
